

KeePass Emergency Sheet

29/06/2023

Database file:

The path behind that box is not needed for the lore and I would appreciate if it could remain private please. Desktop_pet\LORE\Thoughts.kdbx

You should regularly create a backup of the database file (onto an independent data storage device). Backups are stored here:

No backups, to dangerous

Master Key

The master key for this database file consists of the following components:

- **Master password:**

01010111010100110100011001110110011000100000011010010110011001100101011011100110110000100000

- **Key file:**

The path behind that box is not needed for the lore and I would appreciate if it could remain private please. desktop_pet_home\LORE\planning\Thoughts.keyx

You should create a backup of this file. Backups are stored here:

No backups, to dangerous

Instructions and General Information

- A KeePass emergency sheet contains all important information that is required to open your database. It should be printed, filled out and stored in a secure location, where only you and possibly a few other people that you trust have access to.
- If you lose the database file or any of the master key components (or forget the composition), all data stored in the database is lost. KeePass does not have any built-in file backup functionality. There is no backdoor and no universal key that can open your database.
- The latest KeePass version can be found on the KeePass website:
<https://keepass.info/>.

!*****_HL
step 1: reverse string
step 2: Apply a Cesar (shift 10)
step 3: set it to base32
